WHO SHOULD ATTEND

- Mid-to senior-level managers who are in traditional leadership positions – of business units, functions, and products – who want to better leverage digital in their current leadership roles.
- Executives seeking to gain insights into the types of technologies that will enrich their innovation strategy and boost their business performance.
- Business leaders who strive to be more proactive in implementing new ideas, staying ahead of the competition, and aligning their people, data, and technology.

OVERVIEW

Powerful and emerging technologies today including the cloud and AI, mean any business going through a digital transformation journey will discover rewarding opportunities, but will also have to face potential threats. Today's global leading organisation's all recognise digital technologies as a valuable component essential to thrive in our highly volatile world. The Digital Transformation Toolbox has been developed to equip you with a practical knowledge and skills that will enable you to embrace these opportunities while competing in a digitally-centric world.

As part of the Clinton Leadership Institute's **Innovation: Strategy: Transformation** series of programmes that address upskilling and the digital economy, this immersive 2.5 day course offers a deep dive into digital transformation, assisting a mind-set change. Participants will walk away primed to enrich their innovation strategy, drive digital value and opportunities, boosting their business performance.

The Digital Transformation Toolbox encourages a mind-set change – assisting you to understand, explore and reflect on a range of potential technologies that could create value for your business. Skills and tools are covered to equip you with the know-how and confidence to take the next step and implement new technology. Examples of technologies covered on the course include artificial intelligence (AI), internet of things (IoT) augmented/virtual reality (AR/VR) Blockchain and 3D printing. An interactive experience is provided to highlight how various technologies are implemented in practice.

Throughout the programme, you will gain a deeper understanding of the value of digital transformation from leading industry guest speakers, sharing their personal experiences, insights, tips and future predictions gained from their personal digital transformation journeys. It will support you in becoming more proactive in the digital domain, help you turn digital threats into opportunities, and allow you to leverage digital to create competitive advantage and enhanced performance.

Through our exceptional online campus platform, will be able to access videoconferences, forums, readings, slides, technical notes, multimedia documents, and case studies required for the programme.

We shall give you an immersive deep dive into digital technologies and transformation, shifting your mindset, boosting your knowledge and equipping you with the tools to confidently lead in these volatile times.

You will have the opportunity to network with like-minded professionals and learn from your peers as well as industry experts and faculty.

How You Will Benefit

- Identify the elements of Industry 4.0 and examine why it is applicable to your business for innovation and growth.
- Understand the aspects of digital transformation – what it is, why it is needed and how to enhance your business with a digital transformation strategy.
- Explore a range of digital tools that can assist with a data analytical approach to business decision making.
- Analyse the key features of a range of emerging technologies and investigate the benefits and challenges associated with their implementation.

WHO IS THIS PROGRAMME FOR

The programme is ideal for business leaders wishing to gain a deep dive into digital transformation and walk away with a practical toolbox to lead digital disruption with confidence.

Developed with the busy executive in mind, this programme is suitable for professionals from any industry - mid-to senior-level managers, leaders of a functional department, head of a business unit or product development, executive with general management responsibilities and those who wish to understand, innovate and embrace the opportunities presented from digital disruption.

Our interactive classes provide hands-on experience for executives to explore how to extract value from emerging technologies and align your organisation for effective application of digital technologies, including artificial intelligence, internet of things (IOT) augmented/virtual reality, Blockchain and 3D printing. This programme is the next step for organisation's and executives ready to add tangible value through digital transformation and wishing to gain the knowledge, expertise and tools to successfully lead disruption in their industry.

ON-CAMPUS

"You never find things by fighting the existing reality. To change something, build a new model that makes the existing model obsolete" Buckminster Fuller

PROGRAMME FACULTY

BRENDA CLERKIN

Brenda is a Lecturer of Practice at Queen's Management School. Brenda brings over 14 years of professional experience working with EY internationally and in NI. This experience spanned small and medium enterprises, based in the UK and Ireland, to large multinational organisations across a number of different industries including aerospace, agriculture, leisurewear, luxury apparel, utilities and the public sector. Brenda is passionate about improving how businesses are run and views a dynamic combination of effective leadership and the implementation of digital technologies as critical to organisational success. Brenda brings leadership theories to life through the application of real world experience and insights.

EXCEPTIONAL EXECUTIVE EDUCATION EXPERIENCE

The Clinton Leadership Institute delivers executive education programmes with the aim of creating real impact for leaders, managers and their organisations. Our mission, while addressing future work skills and workplace requirements, is to empower and develop leaders and future generations of leadership to create positive social and economic impact for a better world. Our executive programmes synergise the rich Queen's University academic heritage with cutting edge leadership thinking and techniques from experts at William J. Clinton Leadership Institute and Queens Management School. Real world industry insights and exciting new developments from our university research centres contribute to building leadership expertise, transforming individual and organisational performance and boosting competitive edge.

Business leaders today must endorse digital within their organizations to respond quickly and effectively to a diverse range of unpredictable demands. It requires the knowledge to leverage new technologies and create value for customers with speed and flexibility. As part of our new series of Innovation:Strategy:Transformation programmes, we are proud to offer you the opportunity to develop your future skills and workplace requirements for the digital economy. The Digital Transformation Toolbox programme offers you a deep dive into emerging technologies and new perspectives to develop a strategic response to the new digital possibilities. It is designed to empower you with new skills that will greatly boost your ability to innovate strategically and extract value from today's new emerging technologies. During the programme, you will have the opportunity to network and learn from like-minded business leaders from a diverse range of industries, internationally experienced faculty, and insights for expert guest speakers. We hope you will find this programme interesting and we look forward to welcoming you in the near future.
