May 2023

PROGRAMME FORMAT

Blended

LOCATION

Belfast

LANGUAGE

English

PRICE

£2100
Payment options are available

WHO SHOULD ATTEND

Chief executives, senior managers, heads of department with strategic responsibilities, small business owners and technical specialists stepping into a senior leadership role.

OVERVIEW

Anticipating and preparing for the future is always a challenge, but in today's world of rapid technological change, increasing political instability, and rising uncertainty, business executives need new systematic and structured ways to navigate into the future. Strategic Foresight does just that by addressing the question 'How can we formulate strategy in the face of uncertainty?'

This programme will provide you with tools and the knowledge to better anticipate changes that could emerge in the future. You will learn to apply the state-of-the-art of future foresight and long-term planning. To set the context, you will identify and distinguish between various perspectives and approaches to dealing with the future.

Alongside peers, you shall explore the most current challenges in the field of future foresight, namely, the issues related to dealing with uncertainty especially when the future is

influenced by unexpected and sudden events that impact all sectors whether economic, social, technical, environmental, or otherwise. Trends in future foresight and planning and their impact will be a prime focus once the context is clear.

This programme will also give you the opportunity to develop as a leader and explore a suite of tools and frameworks for scenario planning by identifying forces that will shape future market and operating conditions; exploring how those drivers may interact; imagining a variety of plausible futures; revising mental models of the present on the basis of those futures; and then using those new models to devise strategies that prepare organizations for whatever the future actually brings.

Our exceptional digital campus platform will give you access to videoconferences, forums, readings, slides, technical notes, multimedia documents, and case studies required for the programme.

Our programmes are designed to challenge your perspectives and create real impact that will empower you, your team, and your organization with new skills, strategies, and tools.

Network with like-minded professionals and learn from your peers as well as industry experts and faculty.

Learning outcomes:

At the end of this programme, you will have a good understanding of the key concepts and frameworks to:

1. Outline and illustrate the challenges and opportunities in the world of future foresight and the key drivers.
2. Appraise the challenges of dealing with ambiguity and uncertainty and how they affect the ability to think into the future.
3. Analyse methods of applying long-term focus and strategies to industry forecasts and development.
4. Apply futures contexts and ideas to promote future leadership.
5. Formulate foresight as to where new markets will emerge in the next 5-10-20 years and analyse the big issues of the day in the future.

PROGRAMME FACULTY

DR PHILIPPE BOUVIER

Dr Philippe Bouvier is a Professor of Practice in innovation, strategy, entrepreneurship, and urban studies. Philippe is a highly accomplished executive education specialist working with a wide range of corporate and governmental leaders globally. He is an authority on city foresight and planning, smart cities and digital transformation in the organisational and urban environments. He is an enthusiastic advocate of purposeful strategic foresight leadership, innovation and change leadership, and the implementation of digital transformation. Philippe is a highly engaging TEDx and keynote speaker and the author of numerous articles. Philippe holds a PhD from Paris VII University and an executive MBA from INSEAD. As a practitioner, he has experience in implementing foresight planning to create innovative solutions in the corporate environment and start-ups like products, services, internal processes, business models, and strategies.

EXCEPTIONAL EXECUTIVE EDUCATION EXPERIENCE

The Clinton Leadership Institute delivers executive education programmes with the aim of creating real impact for leaders, managers and their organisations. Our mission, while addressing future work skills and workplace requirements, is to empower and develop leaders and future generations of leadership to create positive social and economic impact for a better world. Our executive programmes synergise the rich Queen's University academic heritage with cutting edge leadership thinking and techniques from experts at William J. Clinton Leadership Institute and Queens Management School. Real world industry insights and exciting new developments from our university research centres contribute to building leadership expertise, transforming individual and organisational performance and boosting competitive edge.
