

SHAPING A BETTER WORLD SINCE 1845

OVERVIEW

Data is everywhere. With vast amounts of data now available, companies in almost every industry are focused on exploiting data for their competitive advantage. Analytical methods have been widely applied to better understand, manage, and strategically exploit the complex dynamics of customer behaviour, develop new products and processes, and optimize operations and supply chains. To compete in today's business world, managers must improve data literacy across organizations.

Business Analytics Essentials is an entry level course that introduces the applications of business analytics in the business environment. It focuses on the basic, fundamental principles of business analytics and walks you through the business analytics thinking necessary for extracting useful knowledge and business value

from data.

The programme will help you better use data, and understand fundamental concepts and principles that underlie techniques for extracting useful knowledge from data.

This immersive two day course will empower you to use the data resources in your organisation to generate ideas, evaluate options and improve decision making processes. You will walk away primed to view data in a new light and equipped to extract the value from data, driving opportunities and competitive edge.

Our exceptional campus platform will give you access to videoconferences, forums, readings, slides, technical notes, multimedia documents, and case studies required for the programme.

Gain the knowledge and tools to exploit the value in data, make better decisions and drive your organisations competitive edge. Improve your performance and boost your career advancement your with market-driven business skills.

Network with like-minded professionals and learn from your peers as well as industry experts and faculty.
